OBJECTIVE

Full Stack (MERN) Developer with hands-on experience building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, implementing authentication systems, and deploying production-ready applications on AWS and Vercel. Experienced in integrating AI-based features and optimizing performance for real-world applications. Seeking to contribute to a growth-oriented development team.

PROFESSIONAL EXPERIENCE

Backend Intern 08/2023 – 11/2023
Octaloo Technologies Islamabad, Pakistan

- Assisted in building backend services using Node.js and Express.js
- Worked with MongoDB for data storage and retrieval
- Debugged and tested APIs to ensure reliability and performance
- Gained experience in real-world backend workflows and version control using Git

Back End Developer 03/2026
WayForwardIT Austin, Texas

- Developed and maintained RESTful APIs using Node.js and Express.js
- Designed MongoDB schemas for scalable and efficient data handling
- Implemented authentication and authorization mechanisms • Collaborated with frontend developers to integrate APIs seamlessly
- Optimized backend performance and reduced response times

EDUCATION

BSIT 09/2022 – Present
Bahria University Islamabad, Pakistan

Relevant Course: Object-Oriented Programming, Data Structures and Algorithms, Artificial Intelligence, Operating System, Database Management System (DBMS), Web Development, and Mobile Application Development

SKILLS

Core Stack JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB	Frontend React.js, Tailwind CSS, Bootstrap, Responsive Design
Backend REST APIs, Authentication (JWT), API Integration	Databases MongoDB, MySQL, Firebase
Tools & Deployment Git, GitHub, AWS, Vercel	Other Python (AI/ML basics), Stripe (if used)

KEY STRENGTH

I have strong problem-solving and debugging skills and the ability to design scalable backend systems. I am experienced in deploying real-world applications and maintaining clean, maintainable code. I am a fast learner who adapts quickly to new technologies and focuses on building efficient and user-centric solutions.

PROJECTS

Multi Art
MultiArt is a blockchain-based NFT platform that enables users to mint and trade digital assets. I integrated Solidity smart contracts and connected the app to the Ethereum blockchain using Web3.js and Ethers.js. The platform uses React.js for the frontend and Node.js with MongoDB for the backend.

Nat Kotu — Dashboard & Backend (Next.js + Node.js + MongoDB)
Nat Kotu is an AI-powered dashboard where I built backend APIs and integrated services for generating trending topics, video prompts, videos, and audio narration. I handled long-running tasks using MongoDB to track status and update the UI dynamically, improving performance and preventing timeouts. Built with Node.js, Express.js, and Next.js.

IntelliStay
IntelliStay is a full-stack hostel booking platform built with React.js, Node.js, Express.js, and MongoDB. It allows users to explore and book hostels while enabling owners to manage listings and reservations. I developed RESTful APIs, implemented JWT-based authentication, and integrated an AI recommendation system for personalized suggestions. The frontend is deployed on Vercel and the backend on AWS.
